LINKEDIN POST

Well done Dean!!

By **Keith Parsons, CWNE #3** · 2025-01-13 · originally on LinkedIn

Anyone involved in Wi-Fi should READ THIS post.

You bring up some very relevant issues, as well as a fact-checker against the cellular world's singular view of spectrum being something ONLY they can use… for their own profit.

"Lessons from the History of Wi-Fi" - that section of the CTIA report was a total farce, and attempted to be misleading at best…

Thanks Dean for sharing your critique.
