LINKEDIN POST

I had a great time with Jussi and the entire Hamina team in Helsinki.

Some great new features... I especially liked the company leaning in to Troubleshooting. I was amazed that my MacBook's NIC's details that show up in Adrian's Wi-Fi Signal were nearly identical to the results from Hamina's Live Client View. Amazing!

Who would have thought this was even possible even a year ago.

We are living in the future!
