Network-in-a-Box Lab Kits for a Wi-Fi Authentication Course

By **Keith Parsons, CWNE #3** · 2025-05-14 · originally on LinkedIn

Looking forward to another session of our new Wi-Fi Authentication course - with these new 'network in a box' kits... router, switch, inbound Wi-Fi client, two access points, built-in WLAN Pi, all pre-loaded and pre-configured ready to do lab exercises from Open, through various forms of PSK, to 802.1X/RADIUS and then EAP-SIM, and Passpoint... oh, and a bit of OpenRoaming thrown in for good measure.

Ferney and his team have been hard at work making all the kits, and updating the courseware for this audience.
