LINKEDIN POST

Working with the WLAN Pi App has been quite eye-opening.

By **Keith Parsons, CWNE #3** · 2025-12-02 · originally on LinkedIn

Today Ferney Munoz and I worked on getting WLAN Pi devices to work with Adrian Granados tools, Wi-Fi Explorer and AirTool - using one of the Wireless LAN NICs, and an Orb Client running on BOTH the Ethernet NIC and a second Wireless NIC - all at the same time. Using this WLAN Pi App made this all possible.

You might want to listen in as Ben Toner talks about this new app for working on WLAN Pi devices.
