LINKEDIN POST

Over 30 #WLPC events in, and four requests keep coming up:

By **Keith Parsons, CWNE #3** · 2026-03-31 · originally on LinkedIn

- Bring it closer.
- Hold more of them.
- Give us a deep-dive-only event.
- Make it cost less.

So Ferney and I built something that answers all four.

Two days. 12+ hands-on labs. No presentations. You troubleshoot real problems the entire time, and you leave with the gear — WLANPi R4, two Wi-Fi 6E NICs, laminated checklists, software licenses. All yours.

April 13 & 14 at the Computer History Museum in Mountain View. 30 seats. $1,000. Registration includes Wi-Fi World Congress USA 2026 at the same venue.

Mountain View is the first. More cities are coming — but only if this one fills.
