Every #WLPC Talk Since 2014 — In One Searchable Library

By **Keith Parsons, CWNE #3** · 2026-04-10 · originally on LinkedIn

Victor Njoroge, a WLAN Pro based in Sydney, Australia, built a searchable video library that pulls in every WLPC conference talk from 2014 to 2026 — 1,027 talks across 454 speakers and 12 years of conferences.

The site fetches directly from the WLPC YouTube channel and adds AI-generated summaries and deep dives for each talk. You can filter by year, conference, and topic, or search by speaker name and keyword.

Thanks to Victor for putting this together - very cool.

Heavy Wireless — Two Episodes Since We Last Checked In

HW074: Build Your Own Access Point with Bradley Wegner (March 31) Bradley Wegner led the Build Your Own AP deep dive at #WLPC. He and Keith discuss the hands-on hardware experience of constructing an AP — balancing hardware costs with capabilities, sourcing components, and the software and firmware involved.

HW073: OpenIntent — A Collaborative Effort for Wi-Fi Interoperability (March 17) Keith sits down with Jake Snyder, the developer behind OpenIntent — an open-source effort by

network operators to develop a standard schema for the information needed to deploy network equipment. They discuss why he built it, the building blocks of the schema, and his vision for Wi-Fi design interoperability.
