A Printable Light Version of the Throughput Test Graphic

By **Keith Parsons, CWNE #3** · 2026-08-21 · originally on LinkedIn

Early today I posted a graphic to show the differences between WHERE the throughput testing server might be, and how different locations test different things. I posted it as a PDF so folks could download and print it for their customers. But... it was the DARK version, that may look good on screen but does not print well. Here is a printable light version instead.
